**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 5-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Swan (US D484,671).

In regard to claims 5-8, Swan discloses an undergarment with a generally triangular shaped front panel as seen in figure 1. The triangularly shaped front panel has a left, right and bottom apex. Each apex has a strap extending therefrom. The straps extending from the apexes connect to a triangular connector at a point on the wearer's back below the waistline. The triangular connector of Swan includes the straps at the back of the garment in figure 1 that also form a triangular shape. The undergarment of Swan is as disclosed in claim 6 since the Swan undergarment includes a belt strap with a first and second end which is attached along the top edge. Swan also discloses the bottom strap that extends from the bottom apex and the triangular connector at the rear as stated above. The belt strap(s) encircle the user's waist and attach to the panel as claimed. Swan also discloses the undergarment as claimed in claim 7 with the wedge shaped front panel with the left and right apexes, the bottom portion, the first support strap extending from the left apex and the second from the right apex to extend around the user's waist. The lower strap extends from the bottom

portion. Swan also discloses the triangular connector formed of the straps in the triangular configuration at the rear wherein the straps attach to the triangular connector at an angle of "about 120 degrees relative to each strap". The upper strap is at about 120 degrees of the bottom strap. The wedge-shaped panel does not rise above the waistline and the connector is located below the user's back waistline. The triangular front panel would need to be in a different configuration to pass over the user's waistline.

The present rejection has not been made final due to the finding of the newly cited prior art reference.
